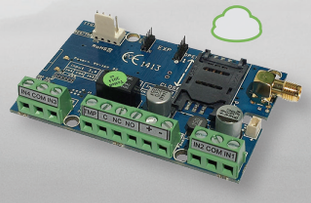
WiFi link

ProCon GSM Cloud



- ProCon GSM Cloud reaches the cloud over a SIM data connection, so communication with the cloud is direct
- The status of the inputs and modules can be queried together with the statistics
- Outputs can be controlled in the cloud, and full remote programming is available too

WiFi/Bt Controller

- Use with no running costs
- 1 NO relay output, controllable over WiFi or Bluetooth
- Control time adjustable from 1 to 240 s
- Unlimited users – over the internet
- 15 users – over Bluetooth

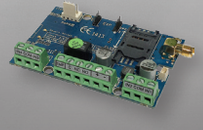
WiFi/Bt Programmer

- The WiFi/Bluetooth programmer allows GSM modules to be programmed remotely over the internet from anywhere
- The programmer is simple to configure and needs no complex network settings.
- Thanks to Bluetooth, the main parameters of the module can also be set from a smartphone

EasyCon GSM

- 2 contact-controlled inputs
- 1 open collector output
- Controllable from 1000 phone numbers
- SMS and voice message to 8 numbers
- Programming by SMS, PC, Android and voice menu

ProCon GSM/4G

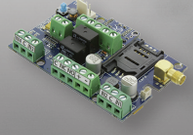


- 5 contact-controlled inputs
- 1 NO/NC relay output, expandable to 4, controllable by voice call from 1000 numbers
- Up to 8 numbers can be notified
- Sends SMS, voice message, Contact ID
- Expandable: ExpAlarm, ExpRelay, ExpBus; GPRS link to the monitoring centre with Enigma and SIA IP protocol
- Programming by SMS, PC, Android and voice menu

ProLine GSM

- Analogue telephone line (PSTN) simulator
- Monitoring and supervision of the phone line (PSTN)
- 2 contact-controlled inputs, 1 OC output, free to control from 1000 numbers
- Sends SMS, voice message, Contact ID
- GPRS link to the monitoring centre with Enigma and SIA IP protocol
- Expandable: ExpRelay1 and 3
- Programming by SMS, PC, Android and voice menu

InterCom GSM



- Also suitable for 4-apartment intercom systems
- 2 relay outputs, controlled by DTMF codes
- Free gate opening from 1000 phone numbers
- Mains power monitoring
- Night mode
